

CLIMATE CONTROL DEVICE

4000-01 Cold Air Tube Assembly

The RPB Respiratory 4000-01 Cold Air Tube Assembly cools compressed breathing air coming into respirators by as much as 32°F (18°C). The 4000-01 Cold Air Tube helps to maximize worker comfort and increase productivity whilst working in hot climates.

The 4000-01 Cold Air Tube Assembly is fitted with an airflow regulator which allows the user to adjust the outgoing air temperature to suit an individual's requirement.

All components of the 4000-01 are replaceable and the unit can be disassembled for cleaning and maintenance.

The 4000-01 is manufactured from non toxic engineering plastic which provides an extremely robust construction to withstand the rigors of the workplace.

WARNINGS

Refer to all instructions and warnings supplied with the 4000-01 and the instructions and warnings supplied with an approved supplied air respirator. Do not modify any RPB Respiratory products as any modification of these products can seriously affect the performance levels and voids NIOSH approvals. RPB Ltd is not liable for injury or death because of use or misuse of its products. Do not use the 4000-01 if the ambient temperature is below 65°F (21°C).
